2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.  
☐ This opinion has been established on the basis of a translation from the original language into the following language  
\_\_\_\_\_, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
  - a. type of material  
☐ a sequence listing  
☐ table(s) related to the sequence listing
  - b. format of material  
☐ in written format  
☐ in computer readable form
  - c. time of filing/furnishing  
☐ contained in the international application as filed.  
☐ filed together with the international application in computer readable form.  
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

<p>Document 1: JP, 9-198336, A (NEC Corp.), 31 July, 1997 (31.07.97), paragraphs [0070]-[0091], Fig. 16 (Family: none)</p> <p>The subject matters of claims 1 and 9 appear to involve an inventive step over the documents cited in the ISR.</p> <p>Document 1 shows a multi-processor system composed of control nodes (client computers) and resource nodes (server computers) both connected to a network wherein a control node outputs write transactions the number of which is M to a resource node via the network; when the resource node receives a first write request message, it sets the state of its resource as reserved so that it cannot accept another write request message and outputs a response message to the first write request message to the control node through the network; and the resource node executes an updating process according to the first write request, whereby the time required for such resource node to process such write request message is shortened.</p> <p>However, document 1 does not describe the construction of a memory access process wherein a multi-process system's processing memory access by a resource node, wherein the controller of the control node shifts its resource to the write-locked state whereby the resource cannot accept any read request or any other write request messages from processors or input/output devices for other requests prior to a request that it receives; and outputs an updating message for the write request message to the resource node, whereby an updating process for a plurality of write-request messages is executed.
